1. To add a new domain to DirectAdmin, go to **Domain Management**, then click **Add New Domain**. In the **Domain Name** field, enter the domain name (e.g., `example.tld`). In the **Username** field, enter the username (e.g., `example`). In the **Password** field, enter the password (e.g., `password`).
2. To add a new subdomain to DirectAdmin, go to **Subdomain Management**, then click **Add New Subdomain**. In the **Subdomain Name** field, enter the subdomain name (e.g., `example`). In the **Domain** field, enter the domain name (e.g., `example.tld`). In the **Username** field, enter the username (e.g., `example`). In the **Password** field, enter the password (e.g., `password`).
3. To add a new FTP user to DirectAdmin, go to **FTP User Management**, then click **Add New FTP User**. In the **FTP Username** field, enter the FTP username (e.g., `example`). In the **Domain** field, enter the domain name (e.g., `example.tld`). In the **Password** field, enter the password (e.g., `password`).
4. To add a new user to DirectAdmin, go to **User Management**, then click **Add New User**. In the **Username** field, enter the username (e.g., `example`). In the **Domain** field, enter the domain name (e.g., `example.tld`). In the **Password** field, enter the password (e.g., `password`).
5. To add a new public_html directory to DirectAdmin, go to **Public HTML Management**, then click **Add New Public HTML**. In the **Public HTML Name** field, enter the public_html name (e.g., `example`). In the **Domain** field, enter the domain name (e.g., `example.tld`). In the **Username** field, enter the username (e.g., `example`). In the **Password** field, enter the password (e.g., `password`).
